The Hortonworks Data Platform, powered by Apache Hadoop, is a massively scalable and 100% open source platform for storing, processing and analyzing large volumes of data. It is designed to deal with data from many sources and formats in a very quick, easy and cost-effective manner. The Hortonworks Data Platform consists of the essential set of Apache Hadoop projects including MapReduce, Hadoop Distributed File System (HDFS), HCatalog, Pig, Hive, HBase, ZooKeeper and Ambari. Hortonworks is the major contributor of code and patches to many of these projects. These projects have been integrated and tested as part of the Hortonworks Data Platform release process and installation and configuration tools have also been included.

Unlike other providers of platforms built using Apache Hadoop, Hortonworks contributes 100% of our code back to the Apache Software Foundation. The Hortonworks Data Platform is Apache-licensed and completely open source. We sell only expert technical support, [training](#) and partner-enablement services. All of our technology is, and will remain free and open source. Please visit the [Hortonworks Data Platform](#) page for more information on Hortonworks technology. For more information on Hortonworks services, please visit either the [Support](#) or [Training](#) page. Feel free to [Contact Us](#) directly to discuss your specific needs.

Apache Jira	HWX Jira	Problem	Solution
N/A	Bug-93305	<p>Oozie Spark workflows are failing with the following exception due to missing py4j and pyspark files after patch upgrade:</p> <pre>Failing Oozie Launcher, Main class [org.apache.oozie.action.hadoop.SparkMain], main() threw exception, Missing py4j and/or pyspark zip files. Please add them to the lib folder or to the Spark sharelib. org.apache.oozie.action.hadoop.OozieActionConfiguratorException: Missing py4j and/or pyspark zip files. Please add them to the lib folder or to the Spark sharelib.</pre>	<p>The workaround is to manually copy these files to HDFS. To do that follow the steps below:</p> <ol style="list-style-type: none"> 1. On the Oozie server, using the HDFS client, find the new sharelib location for the patched Oozie: <pre># su - oozie \$ hdfs dfs -ls /user/oozie/share/lib Found 2 items drwxr-xr-x - oozie hdfs 0 2017-12-14 16:45 /user/oozie/share/lib/lib_20171214164505 drwxr-xr-x - oozie hdfs 0 2017-12-18 18:56 /user/oozie/share/lib/lib_20171218185543</pre> 2.
